EDUCATION

Cavite State University - Imus Campus
Bachelor of Science in Information Technology

Imus, Cavite
2022 - 2026

PROFESSIONAL SUMMARY

Information Technology professional with hands-on experience in networking, structured cabling, VoIP systems, IT support, web development, and mobile application development gained through enterprise-focused internship training and multiple software development projects. Skilled in network device configuration, WordPress website maintenance, troubleshooting, responsive web application development, and Flutter-based mobile applications. Adaptable, detail-oriented, and capable of contributing effectively in fast-paced technical environments with strong collaboration and technical documentation skills.

TECHNICAL SKILLS

- Networking & Infrastructure: VLAN Configuration, Router & Switch Troubleshooting, Structured Cabling, CAT6 Termination, Fiber Optic Handling, Cable Testing
- VoIP & Communication Systems: Grandstream UCM, IP Phones, Cisco Devices
- Web Development: HTML5, CSS3, JavaScript, Bootstrap, PHP, MySQL, WordPress
- Mobile Development: Flutter, Android Studio
- Programming Languages: Java, Python, PHP, JavaScript
- IT Support & Tools: Hardware & Software Troubleshooting, Device Configuration, System Maintenance, Microsoft Office, Canva, Adobe Acrobat

PROFESSIONAL EXPERIENCE

Telematico Corporation

Information Technology Intern

Pioneer, Mandaluyong

March 02, 2026 - May 15, 2026

- Completed 486 hours of hands-on training focused on networking, structured cabling, VoIP systems, IT support, and website management.
- Configured and tested Grandstream UCM devices, IP phones, and VLAN-based network setups for business communication systems.
- Assisted in CAT6 termination, fiber optic cable handling, cable testing, and structured cabling deployment at Megatower project sites.
- Performed website maintenance and optimization using WordPress, including plugin updates, debugging, content management, and security cleanup.
- Removed spam and inactive user accounts, improving website organization and reducing security risks.
- Supported troubleshooting of routers, switches, network devices, and system configurations for client deployments.
- Participated in client coordination, project meetings, floor plan validation, and technical documentation related to structured cabling projects.

Office of Congressman Adrian Jay Advincula, House of Representatives

CARE (Congressional Assistance Response and Education) Staff

Imus, Cavite

June 2026 - Present

- Assist beneficiaries in processing government assistance programs.
- Perform data encoding, record updating, and document verification.
- Support applications for Bigas, PhilHealth, and other congressional assistance services.
- Provide applicant assistance regarding requirements and application status.
- Maintain organized records and support efficient workflow operations.

PROJECT EXPERIENCE

Arduino-Powered Smart Home Hub with Solar Socket and Backup Switching

Role: Embedded Systems & IoT Developer

Technologies: Arduino, ESP32/ESP8266, C++, Sensor Integration

- Developed a smart home automation hub with solar-powered socket support and automatic backup power switching.
- Implemented real-time telemetry monitoring for current and voltage data collection.
- Designed a live monitoring dashboard for system status and data visualization.
- Integrated sensor communication and power management logic for reliable automation.

Event Registration & Ticket QR Scanner Platform

Role: Full-Stack Developer

Technologies: React.js, NestJS, JWT Authentication, QR Code Integration

- Built a multi-role event management platform consisting of Admin, Organizer, and Attendee applications.
- Developed a NestJS backend API with JWT-based authentication and role-based access control.
- Implemented QR code ticket generation and scanning for secure event check-in and attendance tracking.
- Designed responsive React interfaces and integrated frontend applications with backend services for real-time event operations.

Fishpond Monitoring System

Role: IoT & Full-Stack Developer

Technologies: ESP32, Firebase, MySQL, Flutter, JavaScript

- Developed a real-time fishpond monitoring system using ESP32 sensor integration for environmental data collection.
- Implemented email alert notifications for critical monitoring conditions.
- Integrated Firebase and MySQL for secure cloud-based and relational data storage.
- Created monitoring features for sensor data tracking, alert management, and system status reporting.

Metroville Executive Court Reservation System

Role: Lead Full-Stack Web Developer

Technologies: HTML, CSS, Bootstrap, JavaScript, PHP, MySQL, Chart.js

- Designed and developed a web-based reservation and scheduling system for managing court bookings and user reservations.
- Implemented user authentication, booking approval workflows, conflict checking, and status management for pending, approved, and declined reservations.
- Created an administrative dashboard with real-time statistics and data visualization using Chart.js.
- Integrated MySQL database operations, responsive Bootstrap interfaces, and dynamic reservation validation to improve booking accuracy and user experience.

CERTIFICATIONS

- Grandstream Academy – Unified Communications (UC) & Networking Certification Cisco
- IT Customer Support Fundamentals Certificate
- Ratatype Typing Speed Certificate – 65 WPM | 98.8% Accuracy
